

Anti-Fatigue Mat – Recycled Rubber For Work Area's

Anti-Fatigue Mats - Features

Features: Our rubber floor mat works well in all areas. Closed cell feature helps stop absorption of dust and liquids. Very user friendly, light weight, easy to clean. Repeat Mats are a two layer system closed cell strong and durable Recycled Rubber top. With a Recycled Rubber and Expanded Polybead combination bottom layer specifically designed for rebound reduction and repetitive impact compression and come complete with safety bevel, all service carts roll over our rubber floor mats with ease. Factory customized shapes and sizes are available .

Standing for very long periods of time on hard floor surfaces is one of the most common causes of physical fatigue, which occurs when muscles are constricted causing reduced blood flow. The result is pain and discomfort, especially in the back and legs. The heart is forced to work harder and the body begins to run out of energy, increasing the likelihood of slips, sprains and strains.

Benefits: Promotes employee wellbeing. Immediate increase in productivity and employee morale due to work place comfort (this may vary from employee to employee.) Guaranteed increased reduction of exposure to prolonged cold, heat and vibration. Our mat reduces spinal compression. Increases circulation. Ergonomically designed guaranteed reduction of back, leg, foot and ankle fatigue.
