

## Mini Spill Barriers

The Latest's Innovation in Recycled Rubber Spill Barriers

**Mini Spill Barriers – 1.5m long by 60mm high by 150mm wide with yellow safety panels.**

**Repeat Rubber Mini Spill Barriers are an essential item for all factories, they have many uses from the storage of liquids to containing wet areas or even washing your car.**

**The barriers can be secured around tanks or machines to contain liquid and the spread of spills. Also great for wet areas where there is a danger of spills contaminating adjoining areas and creating a fire hazard.**

The Repeat Rubber Spill barrier is made of recycled rubber crumb and a low viscosity moisture cured polyurethane which is a MDI based polyether and has been designed for moulding and binding rubber applications.

We don't recommend that heavy solvent based products or petroleum products be contained by this product as it will cause the product to break down. Any product spilt in containment area should be cleaned immediately.

Repeat Rubber P/L disclaim responsibility for damages resulting from the use of or reliance upon this product. No expressed or implied warranties are given what so ever.
