

Play Ground Safety Edging

Safety Edging

Safety Edging is ideal for use around loose filled playgrounds such as bark and sand. Safety Edging are secured to the substrate with internal pins. The edging is engineered for fast, simple installation and can bend not only around tight corners but also up hills. No expensive concrete footings or excavation is required. Once installed, Safety Edging looks like a continuous edge.

Pictures Of Safety Edging

For playgrounds we recommended the safety edging which is pinned into the ground.

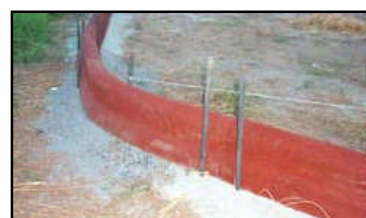

Dimensions:

160mm Wide at Base 100mm Wide at Top

200mm High x 2.2metre Long or

300mm High x 2.2metre Long

Colour: Brick Red or Moss Green

Safety Edging has pre-drilled holes for fast-easy installations.

Fast, easy on-site installation Theft proof sub-level locking system
4 steel - 16mm dia. X 600mm long deformed bar locking pins- per 2.2m length

Pricing, Specification & D.I.Y. Tips For Edging

Joining the Safety Edging

Sikaflex 221 is a medium modulus elastomeric joint sealant/adhesive. It is tough, abrasion resistant, bonds to rubber extremely well and has excellent elongation ability. One sausage covers approx. 5 joins.

Colour: Black & Red

Curve Edging combination with rubber rocks.
