

## Perfect for Parks, Schools and Kindergartens

## Safety Edging

Safety Edging is ideal for use around loose filled playgrounds such as bark and sand. Safety Edging are secured to the substrate with internal pins and glue. The edging is engineered for fast, simple installation and can bend not only around tight corners but also up hills. To assist with tricky shapes 90° Safety edge Corners are also available. No expensive concrete footings or excavation is required. Once installed, Safety Edging looks like a continuous edge.

Made from solid Recycled Rubber

Safety Edging has pre-drilled holes for fast-easy installations.

Be creative use Safety Edging in combination with rubber rocks or animals.
