

COURT PAVE

“Court pave” is a specially formulated, tried and tested acrylic Sports System.

PRODUCT DESCRIPTION

After lengthy formulation research, utilising the highest international quality, 100% resins, reinforcing powders and incorporating in-depth pigmentation, “Court pave” has proven to be the truly ultimate in sporting systems.

PLAYER COMFORT

“Court pave” lessens player fatigue, decreases surface temperatures (by up to 50%), has superior traction and is glare free.

“Court pave” has also excellent characteristics on true and even ball bounce and speed. Speed can be determined at the application stage.

TOUGH AND WEARING

“Court pave” , because of its superior developments is extremely tough and hard wearing.

“Court pave” will protect court surfaces from weather, is non-fading, not affected by ultra violet rays or surface water, will resist cracks and splits, is scuff, chalking and stain resistant and is flexible and resilient to most types of punishment from weather and user.

MAINTENANCE

“Court pave” is a low maintenance system which is easily cleaned. Strong detergents will not affect the surface.

Anti-fungal ingredients in “Court pave” reduce the chances of algae growth developing. This of course, depends also on court drainage and sunlight availability. A water and chlorine treatment will generally eliminate these problems.

USAGES

“Court pave” can be used for many applications and sports including Tennis, Netball, Basketball, Volleyball; and is ideal in multi-sports facilities.

EXPORT QUALITY

“Court pave” has been used successfully in a number of overseas countries and ranks favorably with other products used.
